

Vacuum Generator

ECO

Maximum vacuum flow: 94-Kpa

HANWHA

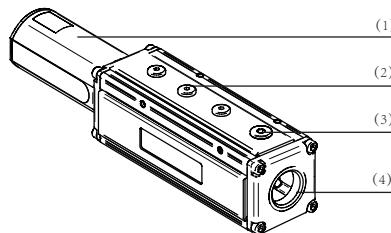

Product characteristics

- *The vacuum generator body is made of aluminum oxide
- *Multi stage vacuum tubes can meet the vacuum flow rate in different situations, thereby improving the vacuum degree.
- The vacuum interface is threaded G3/4

Product structure

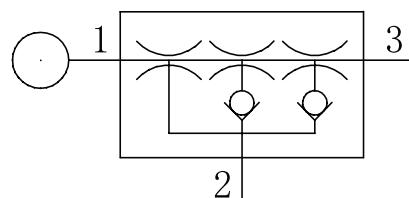

- *Main body: Made of aluminum, small in size and light in weight
- *(1) Silencer: made of anodized aluminum oxide
- *(2) V: G1/8 vacuum detection port
- *(3) P: G1/4 compressed air inlet
- *(4) V: G1 vacuum connection port

Product advantages

- *Modular, fast and convenient installation design, vacuum system with advantages such as economic efficiency and reliable operation, can greatly simplify the selection and work of vacuum systems. Provide customers with more convenience.

ECO-H6010 Ordering NO

1-Series	2-Model	3-Specifications
ECO	Vacuum generator	
	H6010	
		H High vacuum
		M Low intake
		L Low vacuum
4- Number of vacuum tubes	5-Silencer	
01~04	1-4 occurrence canals	No silencer
		S With silencer

ECO-H6010 Technical Data

Models	Use fluid	Temperature [°C]	Intake pressure [Mpa]	Air consumption [L/Min]	Vacuum pressure reached [-KPa]	Maximum vacuum flow [L/Min]
